

Telecommunications Services

A Shared Vision

For telecommunications service providers, delivering high-quality services to end users is critical. Whether focused on maintaining an edge in an increasingly competitive marketplace, attracting new customers, or offering broadband, video or other new services, providing unrivaled quality and value is key to future success. The team at nextGen operates on the same philosophy.

Since its inception, nextGen has worked hand-in-hand with telecommunications and broadband service providers to optimize their networks. NextGen's comprehensive engineering, construction and fiber optics services enable ILECs and CLECs to rely on an outsourced partner to support immediate and on-going business objectives.

Based on this track record, nextGen has earned a reputation for quality, reliable, professional and flexible services, priding itself on being the kind of partner that carriers demand and deserve.

A Single Source for Network Needs

NextGen understands that a successful network starts with a well-engineered design, dependable construction and comprehensive project management. To that end, nextGen's service offerings are designed to help telecommunications customers build, upgrade and maintain networks cost effectively, efficiently and safely.

Engineering services

NextGen's extensive outside plant (OSP) experience combined with its field engineering results in a wide-range of mapping, design, permitting, make ready engineering and related services.

Construction services

NextGen builds, upgrades and maintains fiber and copper networks in their entirety or in part, whether aerial, underground, or in-building.

Fiber optics services

NextGen's extensive fiber optics expertise goes well beyond simply placing fiber optic cable to more advanced network design, fiber splicing, fiber testing and full documentation services.

NextGen ensures that all engagements are executed with skilled personnel, using the appropriate equipment and processes in order to deliver results on-time and on-budget.

Proven Track Record

NextGen acts as a trusted partner to telecommunications customers, providing the flexibility, scalability and mobility required to meet their individual needs.

- ✓ **Full-service provider:** NextGen is equipped to address customers' requirements including design, routing, materials and equipment procurement, warehousing, and logistics.
- ✓ **Project customization:** Customers can work with nextGen on long-term contracts through Master Service Agreements or on short-term, specialized engagements to address individual projects.
- ✓ **Deep expertise:** NextGen's leadership team has more than 90 years of experience building and maintaining telecommunications networks, from pole sets/removals to complete FTTx networks.
- ✓ **Dependable team:** NextGen's team is an extension of the customers' organization and comprised of ethical, professional and reliable personnel.
- ✓ **Focus on safety:** NextGen supports industry safety practices via OSHA 10 Hour and OSHA 30 Hour training and certification, in addition to its internal training programs.
- ✓ **Unrivaled mobility:** NextGen responds quickly to customer needs, providing the equipment, team and processes to handle emergency situations.
- ✓ **Customer success:** NextGen has worked with carriers throughout the eastern United States, including Verizon Business, Level (3) Communications, TDS Telecom, Granite State Communications, Oxford Networks and segTEL, among others.

Areas of Expertise

Aerial & underground OSP construction	DOT projects
Pathway construction	Pole sets/removals
Copper & fiber splicing	Right of way clearing/trimming
As-built documentation	Emergency restoration
RUS projects	Storm damage repairs

About nextGen

NextGen Telecom Services Group offers communications network infrastructure engineering, construction and fiber optics services to service providers, enterprises, government and municipal customers throughout the eastern United States. More information about the company is available at www.ngengroup.com.

“ We have relied upon NextGen for new outside plant builds, existing plant overbuilds, project feasibility studies, emergency repair/restoration, and a whole host of other major activities. We consider them to be a close business partner and integral part of our strategy. ”
